Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Specification

1. The abstract of the disclosure is objected to because the last line of the Abstract should be deleted or amended in order to remove "improved motor life and reliability" phrase. Correction is required. See MPEP § 608.01(b).

Claim Rejections - 35 USC § 103

2. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

3. Claims 1-19 are rejected under 35 U.S.C. 103(a) as being unpatentable over Garza Jr (5480353).

Garza discloses a harvester combine having a hydraulic motor (42) flexible support (44) output shaft and input shaft to another device to be rotated (col. 8, 1st paragraph), and shown in the marked up drawings below:

Garza discloses the claimed device except for being used for a cleaning fan assembly.

It would have been obvious to one having ordinary skill in the art at the time the invention was made to provide the motor support of Garza for any other device utilizing a motor, including a fan assembly, since it is well known to provide a support for a motor and Garza's motor support is just one of the many possibilities, which can also provide for an easy replacement of the motor when burns out or becomes defective.

Conclusion

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Fisher (3760654) shows an alternative motor support arrangement (fig 2, ref 41).
